

# Comprehensive Asset Management

Manage, protect and optimize solar, wind and energy-storage projects throughout the asset's life cycle.

## What is Comprehensive Asset Management?

Radian Generation's Comprehensive Asset Management (CAM) service is a 360° technology-enabled program optimized to ensure projects perform at their peak. Whether it's for a single asset or large portfolio, utilizing Radian's proprietary LENS Asset Management software provides complete operational oversight and administration to ensure projects operate efficiently and maximize ROI.

## Why use third-party asset management?

Independent, third-party asset management with Radian can bridge the gap between O&M providers and project requirements. Radian's dedicated team delivers decades of experience at the drop of a hat, and a lower cost than most internal teams, allowing owners to focus on their core business—developing, owning, and operating.

## How can Radian Increase Profitability?

- A customer service-driven team providing expertise, analysis and insight so your assets can remain online and at optimal performance.
- Measure quality and improve performance at the component level, project level, and fleet level to reduce risk.
- Simplified project management tools allow for flexible portfolio aggregation, streamlined DAS integration and lower costs.
- Real-time reporting means less time on predictable and repetitive tasks, lining up resources for the most added value.

## Radian By The Numbers

**13+ GW**  
of solar and wind  
assets managed globally

**3 GW**  
of LENS  
software customers

More than  
**1,800**  
solar and wind projects  
currently under management

## Asset Management Service Packages for Solar and Wind

Available together in Radian's Comprehensive Asset Management package or as customized solutions based on specific needs

---

### Technical Asset Management

Includes Operational Oversight + Performance Optimization

- Provides an analysis of technical performance to maximize energy production and asset longevity.
- Includes monitoring and reporting on issues requiring immediate attention as well as identification of long-term trends in production.
- Incorporates O&M contractor oversight and dispatch to ensure timely resolutions

### Compliance Asset Management

Includes Contract Compliance + Project Management

- Includes tracking of portfolio contractual and regulatory operational obligations as dictated in project agreements.
- Facilitates secure cloud-based document storage in central repository with hardened redundancy
- Experienced day-to-day project management and technical support

### Financial Asset Management

Includes Financial Compliance + Financial Management

- Radian manages all activities related to project and portfolio finances.
- Ensures all financial obligations are met including SREC credit tracking, PPA billing, management of financial entities and tracking financial compliance.
- Pre-defined workflows are leveraged to track and monitor financial tasks with automated alerts to ensure compliance.

## About Radian

Radian Generation was founded in 2013 on the core principle of driving sustainable growth by providing best-in-class asset management solutions for the renewable energy industry. During the formative years of the solar and wind market, the experiences accumulated by members of its team of industry veterans fostered an acute awareness of the need for versatility, continuity and resiliency in a third-party business model for managing projects expected to last for decades. Today, Radian continues its industry-leading practices with over 13 GW of solar and wind assets under management around the world.
